

I'm writing to urge the FCC to reject the NAB petition 04-160. Whether I subscribe to XMRadio or Sirius Satellite Radio, my choice is the key here. My choice is to receive what I want when I want it, and that's exactly what I receive currently with my subscription with XMRadio. I benefit greatly from XM Instant Traffic & Weather programming in my travel throughout the USA. I believe it is my right, to receive this programming from the provider of my choice and not to be dictated to by the NAB and forced to utilize only local AM and/or FM channels for this type of programming. If I want to receive Traffic and/or Weather updates from local stations, I simply tune them in, as that still remains my right to do so. Don't strip me of my right to receive this information from my Satellite Radio provider. Thank you.
